- DZS305** – KIT – 1000 ml refill and a 500 ml empty foaming dispenser for wall

PRODUCT CONCEPT

99,9 % PROtected hands! Quickly and effectively cleans mechanical contaminants from the skin. The included Propolis extract ensures natural protection against pathogenic microorganisms. The gentle formula with Myristic acid (saponified pure fatty acid), without sulfates, guarantees fast, excellent washing and rinsing. Contains Glycerin, which prevents dehydration. The combination of Citric and Lactic acids acts as a natural exfoliant and softens the skin.

Key product components:

- **Propolis extract** – has a cleaning, antibacterial, anti-inflammatory effect and prevents the development of fungal infections on the skin;
- **Glycerin** – has the ability to attract and retain moisture in the skin, thus protecting and restoring its natural barrier function;
- **Citric and lactic acid** – gently exfoliate and soften the skin.

APPLICATION

Moisten the area, which needs to be cleaned and spread a decent amount of soap-foam. Rub energetically for 20 sec., then rinse off the product. If necessary, repeat the procedure.

Tips & trics SNB Professional: By frequent use, use in combination with SNB hand cream.
