HANDS AND BODY CREAM-GEL WITH ALOE VERA SPHERES & ARUGULA EXTRACT CAS761 / CAS762

PRODUCT CONCEPT

Suitable for frequent everyday use when hydration of the skin is needed. Especially effective during the summer. Microspheres retain all of the useful features of Aloe until its application on the skin. In combination with glycerin and aquaxyl a complex skin care is achieved. The arugula extract supports the natural protective barriers of the skin and stimulates the synthesis of the most important natural tripeptides, which are the basis for its smooth and radiant appearance. Menthol and centella asiatica extract compliment the action of the active ingredients by calming the skin and leaving a fresh feeling.

94% of the ingredients are **naturally derived** according to the criteria of international standard **ISO 16128**.

Key product components:

- **Glycerin** – soothes and moisturizes the skin;
- **Aquaxil** – increases skin elasticity and provides rapid hydration;
- **Centella asiatica extract** – has regenerating and anti-inflammatory action;
- **Arugula extract** – soothes, promotes regeneration and improves skin appearance;
- **Aloe Vera extract** – restores, regenerates and protects the skin from aging;
- **Menthol** – has refreshing and cooling effect.

APPLICATION

Apply on clean dry skin with a gentle massage until the emulsion is completely absorbed.
