PRODUCT/ PHOTO

EXPERT REMOVER for nail lacquer, gelacquer, acrylic nails with aloe, rose water, lanolin and vitamin E PR151/152/153

PRPDUCT CONCEPT

Designed to remove nail polish and semi-permanent gel-polish. Aloe Vera and Lanolin nourish and protect nails from excessive moisture loss, Vitamin E acts antioxidant and strengthening, while Rose Water and Castor Oil prevent whitening of the skin around the nails. The ingredients balance the action of the used acetone.

Key product components:

- **Rose water** – soothes, protects skin folds and nails from irritation;
- **Lanolin** – nourishes and protects against dehydration;
- **Aloe Vera** – moisturizes nails and cuticles;
- **Vitamin E** – strengthens the nails;
- **Castor oil** – protects nails and skin around them from whitening.

APPLICATION

Nail polish removal: Clean the remaining nail polish with a cotton pad soaked in Expert Remover.
Semi-permanent gel polish and acrylic nails removal: 1. Gently buff the surface of the gel polish with a file. 2. Place a cotton pad soaked in Expert Removal on each fingernail and wrap in foil for about 10-15 min. 3. Carefully remove the remaining coating with a suitable instrument.
