

PRODUCT/ PHOTO

Callus removal spray PSN301

PRODUCTION CONCEPT

A spray created to soften callused skin areas and make their removal easier by stimulating the natural regenerative functions of the skin. The used linden tea soothes it, refreshes it and facilitates its healing, gently complementing the effect of the added urea and glycerin. Chamomile extract, Lavender and Eucalyptus oils contribute to sustaining the moisture. **91%** of the ingredients are **naturally derived** according to the criteria of international standard **ISO 16128**.

Key product components:

- **Linden tea** - soothes the skin, refreshes it and facilitates its healing, gently complementing the effect of the added urea and glycerin.
- **Chamomile extract, Lavender and Eucalyptus oils** - contribute to sustaining the moisture

APPLICATION

Spray on the callus areas until moist and wait 3-4 minutes, after that remove the softened skin with a file. If necessary, spray again. After removing the calluses, rinse the feet with water and finish the procedure applying Hydrolipid foot cream SNB.

SNB Professional tips & tricks: If necessary, repeat the procedure after a few days, until the desired result is achieved.
