

PRODUCT/PHOTO

Nail therapy with Hexanal MPNZ40

PRODUCTION CONCEPT

Nail therapy with Hexanal with a special formula for reconstructing and renewing weakened and damaged nails. Heals and improves the condition of the nail plate after 2 applications within 7 days.

Key product components:

- Hexanal - strengthens the nail surface;
- Alpha hydroxy acids - reconstructs and refreshes the nail surface;
- Vitamin B5 - hydrates the nail plate;
- Vitamin C - nourishes the nail in depth.

APPLICATION

Apply **Nail therapy with Hexanal** on clean natural nails. Repeat the coating after 2-3 days. Visible results can be noticed in 7 days.

Recommendation: Use on damaged nails after removal of UV gel, acrylic or gelacquer coatings. Apply twice a week or as a base under the applied colored nail polish.
